GAUGES AND DIAMETERS :

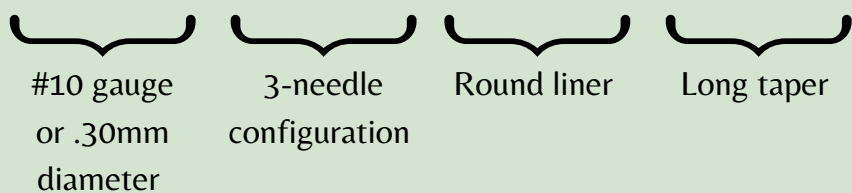

EXCEPTIONS AND ONE-OFFS:

- SOME MANUFACTURERS AND/OR DISTRIBUTORS WILL LIST THE GAUGE DIAMETER IN MM INSTEAD OF THE GAUGE NUMBER.
- SOMETIMES RLT MEANS ROUND LINER TIGHT AND SOMETIMES IT MEANS ROUND LONG TAPER - BE SURE TO CHECK WITH YOUR SUPPLIER.
- SOME MANUFACTURERS USE THE "M" MEANING "MICRO" OR NANO INSTEAD OF "MAGNUM." THIS USUALLY HAPPENS WHEN THE MANUFACTURER MAKES PMU CARTRIGES BUT DOES NOT MANUFACTURE TATTOO CARTRIDGES.
- SPECIFIC TAPER LENGTH MEASUREMENTS ARE NOT LISTED ABOVE DUE TO VARIATIONS IN THE ACTUAL LENGTH. EX: ONE MANUFACTURERS LONG TAPER COULD BE 6MM AND A DIFFERENT MANUFACTURERS LONG TAPER COULD BE 7MM. PLEASE CHECK WITH YOUR SUPPLIER IF YOU ARE UNSURE.
